

KURSPLAN

Statistiska metoder II, 3 högskolepoäng

Statistical Methods II, 3 credits

Kurskod:	FHST235	Utbildningsnivå:	Forsknivå
Fastställd av:	Utbildningsrådet 2024-09-24		
Gäller fr.o.m.:	Våren 2025		
Version:	1		

Lärandemål

Upon completion of the course, the student should be able to:

Kunskap och förståelse

- explain statistical output from multivariate analyses
- understand the criteria for selecting appropriate statistical analysis for a complex set of data.

Färdighet och förmåga

- structure data material in an appropriate way for the chosen statistical methods
- perform certain statistical procedures with scientific accuracy
- carry out an in-depth analysis of the advantages and limitations of statistical procedures.

Värderingsförmåga och förhållningssätt

- critically review and evaluate statistical results and conclusions
- assess aspects of validity and reliability in quantitative research.

Innehåll

- log-linear regression
- reliability analysis,
- aspects of factor analysis, and
- basic level of Structural Equation Modeling
- practice in the SPSS environment.

Undervisningsformer

The course is implemented through lectures and seminar.

The teaching is conducted in English.

Undervisningen bedrivs på engelska.

Förkunskapskrav

The applicant must hold a degree at advanced level or passed course requirements of at least 240 credits including 60 credits at advanced level including a thesis of 15 credits (or the equivalent) and completed course in Statistical Method I or equivalent.

Examination och betyg

Kursen bedöms med betygen Underkänd eller Godkänd.

The course is graded Fail (U) or Pass (G).

Examination of the course will be based upon an individually written assignment and a seminar.

The course examiner is an associate professor or professor

Poängregistrering av examinationen för kursen sker enligt följande system:

Examinationsmoment	Omfattning	Betyg
Individual written assignment	2,5 hp	U/G
Seminar	0,5 hp	U/G

Övrigt

Selection for admission:

1. Students registered in the third-cycle programme at Jönköping University
2. Students registered in the third-cycle programme at another university
3. Other applicants: admission based on the number of credits (the applicants will be selected randomly in the case of equal merits).
