Intended Learning Outcomes (ILO)

On completion of the course the student will be able to:

Knowledge and Understanding

- describe the origins and contemporary conceptualisations of co-production
- identify co-production and related concepts as enacted at the micro-, meso- and/or macrosystem levels
- identify the processes for successful co-production
- explain the importance of engagement with patients and/or citizens in co-production.

Skills and Abilities

- investigate theoretical, ethical and practical applications of co-production
- apply co-production and related concepts.

Judgement and Approach

- critically appraise co-production and related concepts as applied at the micro-, meso-, and/or macrosystem levels
- critically review and evaluate own achievements related to intended learning outcomes
- reflect upon personal experiences and development needs for co-production in practice, improvement work and research.

Content

- applying co-production at the micro-, meso-, and/or macro-system levels
- principles and values of co-production
- power dynamics
- practical skills for co-production in daily practice, quality improvement work and research
- impact, benefits and limitations of co-production

Type of Instruction

The course is web-based including discussion and seminars using a web-based platform.

Language of instruction is English.

Entry Requirements

The applicant must hold the minimum of a bachelor's degree (i.e. the equivalent of 180 ECTS credits at an accredited university) within health sciences, behavioral science, social work, educational sciences, engineering, urban design or equivalent. Proof of English proficiency is required (or the equivalent).

Examination and Grades

The course is graded Pass (G) or Fail (U).

Examination will be based upon an individually written assignment, participation in seminars, and discussions.

Registration of examination:

Name of the Test	Value	Grading
Written assignment	3.5 credits	G/U
Seminars	1.5 credits	G/U
Discussions	2.5 credits	G/U

Course Literature

Please note that the course literature may be revised up to eight weeks before the start of the course.

The most recent editions of the course literature should be used.

Scientific articles and other study materials will be added.
