

COURSE SYLLABUS

Classics in Economics, 3 credits

Classics in Economics, 3 högskolepoäng

Course Code: FJCEC36

Education Cycle: Third-cycle level

Confirmed: Nov 06, 2025

Valid From: Jan 19, 2026

Purpose

The goal of the course is to give the student basic knowledge about economics as a way of understanding business renewal, innovation, and growth, as well as economic organization and collective decision-making. The course also gives the student overview knowledge about the historical development of basic principles in economics. In addition, the course encourages reflection on the societal implications of economic activity, highlighting how economic thought has historically shaped - and been shaped by - debates on collective welfare, equity, and other societal issues.

Intended Learning Outcomes (ILO)

On completion of the course, the students will be able to:

Knowledge and understanding

1. Demonstrate knowledge and understanding of the principles that can shape the relationship between individual and social goals and the scarce resources available.
2. Demonstrate knowledge and understanding of the principles behind the economic analysis of production, the distribution of income and wealth, growth and innovation.

Skills and abilities

1. Critically assess the relevance and the limitations of different theories in addressing contemporary economic issues.

Judgement and approach

1. Demonstrate how different theories in economics are interrelated and how to assess the characteristics of economic organization.

Content

The course content includes:

1. The standard economic method.
2. Public goods and externalities.
3. Information, incentives and contractual solutions.
4. Collective agreements and cooperative games.
5. Collective decision making.

Type of instruction

Lectures and seminars

Language of instruction is English.

Entry requirements

Admitted to a doctoral programme in economics or business administration or a related subject of a recognized business school or university.

Examination and grades

The course is graded Pass (G) or Fail (U).

Active class participation, with qualified contributions to the discussion of the topics, and a paper highlighting the relevance of some topic discussed in connection with some practical phenomenon.

All tasks fulfil ILOs 1 through 4.

The grade for the course are "Pass" or "Fail".

Other information
