

COURSE SYLLABUS

Bachelor Thesis in Economics, 15 credits

Bachelor Thesis in Economics, 15 högskolepoäng

Course Code: JUNP17	Education Cycle: First-cycle level
Confirmed by: Council for Undergraduate and Masters Education Oct 11, 2021	Disciplinary domain: Social sciences (75%) and natural sciences (25%)
Revised by: Council for Undergraduate and Masters Education Oct 7, 2024	Subject group: NA1
Valid From: Jan 13, 2025	Specialised in: G2E
Version: 3	Main field of study: Economics

Intended Learning Outcomes (ILO)

On completion of the course the students will be able to:

Knowledge and understanding

1. Demonstrate knowledge and understanding in economics including knowledge in certain areas within economics.
2. Demonstrate methodological knowledge applicable in economics.
3. Demonstrate insight into current research and development work in economics.

Skills and abilities

4. Demonstrate the ability to integrate knowledge and analyze, assess and deal with complex phenomena associated with economics.
5. Demonstrate the ability to identify and formulate issues independently as well as using appropriate research methods.
6. Demonstrate the ability to plan and execute a research project within a predetermined time frame:
7. Demonstrate the ability to report in speech and writing their conclusions and the knowledge and arguments on which they are based, to discuss results in dialogue with different audiences.

Judgement and approach

8. Demonstrate the ability to make assessments, taking into account relevant scientific, societal and ethical issues and also demonstrate awareness of ethical aspects in research and development work.
9. Demonstrate the ability to identify the need for further knowledge and ongoing learning.

Contents

The course consists of writing a bachelor thesis. The course includes coaching seminars with the supervisor, but is based on independent work. At the end of the course all students must present and defend their thesis at a public seminar, act as main opponent at another student's seminar, and actively take part in three other final seminars. Even though the thesis is written in pairs the

grading of the presentation and opposition is done individually. The purpose of this course is as follows:

- To train and develop the ability of students to independently analyze various economic problems by applying economic theory and scientific methods,
- To develop, in particular, the analytical skills of students in a way that is valuable both for a scientific career and for a career in private enterprises, public administration, or international organizations.
- To train and improve the stylistic ability of the students, the ability and skills of students to search and to evaluate information, and the ability of students to critically and constructively review the analyses of other students.

Connection to Research and Practice

The thesis is closely connected to research as it uses scientific models and frameworks as the basis of the work. The scientific frameworks are used to enhance the student's ability to analyze economic problems and communicate with an academic audience. The thesis work also provides a connection to practice as the students use real-world data that enhance their understanding of the world surrounding them as well the scientific frameworks.

Type of instruction

Seminar-based tutoring.

The teaching is conducted in English.

Prerequisites

60 credits in economics including 7.5 credits at G2F level within the field of the thesis and 15 credits in statistics/econometrics (or the equivalent). The courses Microeconomics and Macroeconomics (or the equivalent) should be finished.

Examination and grades

The course is graded A, B, C, D, E, FX or F.

Examination form:

Thesis (ILOs 1-5, 7-9):

The thesis will be examined through the written thesis, oral presentations, and discussions in five final seminars (defense, opposition, and active participation in three additional final seminars). This represents 70% of the total course grade, equivalent to 10.5 credits. The thesis will be individually graded.

Thesis Process (ILOs 5-7):

The thesis process will be assessed through interaction with the supervisor and active participation in four tutoring seminars during the thesis writing process. This represents 30% of the total course grade, equivalent to 4.5 credits. The process will be individually graded.

Note: A course grade can only be given if all ILOs are passed.

Registration of examination:

Name of the Test	Value	Grading
Thesis	10.5 credits	A/B/C/D/E/FX/F
Thesis Process	4.5 credits	A/B/C/D/E/FX/F

Course evaluation

It is the responsibility of the examiner to ensure that each course is evaluated. At the outset of the course, the programme evaluators in the course must be contacted. In the middle of the course, the examiner should meet the programme evaluators to identify strengths/weaknesses in the first half of the course.

At the end of the course, the examiner should remind students to fill in the survey. The examiner should also call a meeting with the programme evaluators to debrief the course, based on course evaluation data and comments. The next time the course runs, students should be informed of any measures taken to improve the course based on the previous course evaluations.

At the end of each study period, JIBS' Director of Quality and Accreditation crafts a "Course Evaluation Quarter Report", presenting the quantitative results from course evaluation surveys. The Associate Dean of Education, The Associate Deans of Faculty, Programme Directors, and JSA President and Quality receive the report.

Other information

Students write the bachelor thesis in pairs. Even though the thesis is written in pairs the course is examined on an individual basis.

Academic integrity

JIBS students are expected to maintain a strong academic integrity. This implies to behave within the boundaries of academic rules and expectations relating to all types of teaching and examination.

Copying someone else's work is a particularly serious offence and can lead to disciplinary action. When you copy someone else's work, you are plagiarising. You must not copy sections of work (such as paragraphs, diagrams, tables and words) from any other person, including another student or any other author. Cutting and pasting is a clear example of plagiarism. There is a workshop and online resources to assist you in not plagiarising called the Interactive Anti-Plagiarism Guide.

Other forms of breaking academic integrity include (but are not limited to) adding your name to a project you did not work on (or allowing someone to add their name), cheating on an examination, helping other students to cheat and submitting other students work as your own, and using non-allowed electronic equipment during an examination. All of these make you liable to disciplinary action.

Course literature

Compulsory literature

Selected individually based on the thesis topic. The selection will be based on a discussion between students and tutors in relation to the chosen thesis topic.
