

KURSPLAN

Operations Strategy and Innovation, 7,5 högskolepoäng

Operations Strategy and Innovation, 7.5 credits

Kurskod:	TOSS21	Utbildningsnivå:	Avancerad nivå
Fastställd av:	VD 2021-03-01	Utbildningsområde:	Tekniska området
Reviderad av:	Utbildningschef 2024-10-25	Ämnesgrupp:	IE1
Gäller fr.o.m.:	2024-08-01	Fördjupning:	A1F
Version:	4	Huvudområde:	Produktionssystem

Lärandemål

After a successful course, the student shall

Kunskap och förståelse

- display knowledge of key concepts and principles within the interdisciplinary fields of operations strategy and product and service innovation
- display knowledge of different perspectives of operations strategy and the strategic role of innovation and its stages
- demonstrate comprehension of the strategy formation process and of the technologies and organizational structures used in innovation processes

Färdighet och förmåga

- demonstrate skills of strategic analysis and analysis of product and service innovation sourcing
- demonstrate the ability to use the proper tools in evaluating and improving strategy formation and innovation processes
- demonstrate the ability to formulate issues critically, plan and undertake advanced tasks within predetermined time frames and to collaborate effectively in teams
- demonstrate the ability in speech and writing to clearly report and discuss own findings and conclusions

Värderingsförmåga och förhållningssätt

- demonstrate the ability to make assessments of different measures taken for the direction of operations and be able to evaluate such initiatives
- demonstrate the ability to critically analyse the impact operations strategy and innovation has on economic, social and environmental sustainable development

Innehåll

The course covers the topic of operations strategy and the strategic impact of the operations function. It covers different perspectives of strategic management, operations strategy, strategic alignment and strategic consensus. Further, it addresses the strategy formation and aims to give the student an understanding of the complexities associated with this interdisciplinary process.

Further, the course aims to connect innovation management in products and services to strategy formation. After reviewing the foundations of and the strategic role of innovation, an operations perspective on managing innovation in product/service development processes is brought into focus. Furthermore, the requirements (inputs) and expectations (outputs) of innovation processes are addressed. Specifically, the value chain and resources required to support innovation processes, as well as their performance objectives (e.g., cost, flexibility, and sustainability) are underlined.

Undervisningsformer

Lectures, case study seminars, literature seminars, project work.

Undervisningen bedrivs på engelska.

Förkunskapskrav

The applicant must hold the minimum of a bachelor's degree (i.e the equivalent of 180 ECTS credits at an accredited university) in engineering or technology.
