Regenerative Sustainable Venture Development Across Borders, 7,5 högskolepoäng

Regenerative Sustainable Venture Development Across Borders, 7.5 credits

Kurskod:	JRSN14	Utbildningsnivå:	Grundnivå
Fastställd av:	Council for Undergraduate and Masters Education 2022-12-05	Utbildningsområde:	Samhällsvetenskapliga området
Gäller fr.o.m.:	2024-01-22	Ämnesgrupp:	FE1
Version:	1	Fördjupning:	G2F
		Huvudområde:	Företagsekonomi

Lärandemål

On completion of the course, the students will be able to:

Kunskap och förståelse

1. explain key components and challenges of regenerative sustainable ventures including inclusive ventures, sustainable ventures, social ventures, and green ventures;

Färdighet och förmåga

2. develop a regenerative sustainable venture by means of a lean business model that has the ability to deliver a social and ecological sustainable offering

3. design the new regenerative venture utilizing a prototype;

Värderingsförmåga och förhållningssätt

4. identify societal and ecological problems that can be improved with an innovation; and

5. critically select and evaluate information associated with the development of the regenerative sustainable venture working across borders.

Innehåll

The course includes theoretical concepts and implications of regenerative and sustainable venture development across borders. New venture development addresses social and ecological challenges across borders that can be met with innovation. Regenerative sustainable ventures aim to improve the well-being of populations in disadvantaged situations by including them in the venture business model and empowering them to generate societal change and nature restoration. The course gives particular emphasis to entrepreneurial action, including opportunity development, strategic collaborations, frugal innovations, and resource development during start-up, including critical decisions and experiences of sustainable and regenerative entrepreneurs. The content reflects the various aspects relevant to a venture development, including:

- challenges of social and ecological sustainability across borders, including exclusion, lack of services, diseases, environmental degradation, poverty,

- key concepts and models for sustainable ventures like the doughnut economy, planetary boundaries, system thinking, and the circular economy,
- frugal innovations addressing different considerations to sustainability;
- regenerative and sustainable business model innovation and prototyping,
- ethical aspects of the venture,
- collecting, expressing, and analyzing material for building the sustainable and/or regenerative venture across borders,
- presenting the results, and
- relating frameworks to the venture development.

Connection to Research and Practice

The course regenerative sustainable venture development across borders contextualizes the venture development process in line with sustainability; it does so by building on entrepreneurship literature, particularly on the design thinking approach, as well as sustainable development, and sustainable and regenerative business literatures. The course is closely related to JIBS core research focus on entrepreneurship and is delivered by JIBS faculty who are at the research frontier of entrepreneurship with interests in sustainability and regeneration. The students taking the course gain understanding of the importance of identifying the root causes of the social and ecological problems and learn to use design thinking tools when developing solutions to the identified problems. The practical relevance of this course lies in the acquisition of problematization and prototyping skills.

Undervisningsformer

Lectures, seminars, guest lectures, tutoring, reflections, and presentations.

Undervisningen bedrivs på engelska.

Förkunskapskrav

General entry requirements and passed courses 60 credits in Business Administration (or the equivalent).

Examination och betyg

Kursen bedöms med betygen A, B, C, D, E, FX eller F.

The ILOs listed above are assessed through the following types of examination:

Individual written exam (ILOs: 1, 2, 3 & 5) representing 1.5 credits.

Individual Reflection - (ILOs: 1, 2 & 5) representing 3 credits.

Group project – (ILOs: 2, 3, 4 & 5) representing 3 credits.

Poängregistrering av examinationen för kursen sker enligt följande system:

Examinationsmoment	Omfattning	Betyg
Individual Written Exam [†]	1,5 hp	A/B/C/D/E/FX/F
Individual Reflection [†]	3 hp	A/B/C/D/E/FX/F
Group Project [†]	3 hp	A/B/C/D/E/FX/F

¹ The grade is reported when all compulsory elements have been successfully accomplished. The final grade of the course is determined by the sum total of points for all parts of the examination in the course (0-100 points). The grade is set in accordance with JIBS grading policy - A/B/C/D/E/FX/F.

Kursvärdering

It is the responsibility of the examiner to ensure that each course is evaluated. At the outset of the course, the programme evaluators in the course must be contacted. In the middle of the course, the examiner should meet the programme evaluators to identify strengths/weaknesses in the first half of the course.

At the end of the course, the examiner should remind students to fill in the survey. The examiner should also call a meeting with the programme evaluators to debrief the course, based on course evaluation data and comments. The next time the course runs, students should be informed of any measures taken to improve the course based on the previous course evaluations.

At the end of each study period, JIBS' Director of Quality and Accreditation crafts a "Course Evaluation Quarter Report", presenting the quantitative results from course evaluation surveys. The Associate Dean of Education, The Associate Deans of Faculty, Programme Directors, and JSA President and Quality receive the report.

Övrigt

Academic integrity

JIBS students are expected to maintain a strong academic integrity. This implies to behave within the boundaries of academic rules and expectations relating to all types of teaching and examination.

Copying someone else's work is a particularly serious offence and can lead to disciplinary action. When you copy someone else's work, you are plagiarising. You must not copy sections of work (such as paragraphs, diagrams, tables and words) from any other person, including another student or any other author. Cutting and pasting is a clear example of plagiarism. There is a workshop and online resources to assist you in not plagiarising called the Interactive Anti-Plagiarism Guide.

Other forms of breaking academic integrity include (but are not limited to) adding your name to a project you did not work on (or allowing someone to add their name), cheating on an examination, helping other students to cheat, and submitting other students work as your own, and using non-allowed electronic equipment during an examination. All of these make you liable for disciplinary action.

Kurslitteratur

Literature

A selection of academic articles will be provided in the course.
